Multi Language Tool

Better together.

Create learning paths accessible by everyone, at home and around the world—todo incluido. With system-wide multilingual management, you can ensure your efforts are understood by all.

PARA TI

Scale Operations

Spanish available by Q4 2020, with additional languages following in 2021.
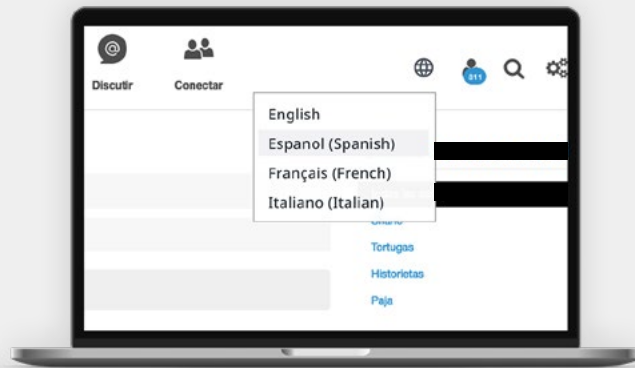

Compliance & Assessments

Set your organization up for success by ensuring everyone is able to learn in the language with which they're most familiar.

Build Community

Speaking someone's language creates an open, welcoming atmosphere where people can be themselves and company culture can flourish.

Give Everyone a Voice

Ideas can come from anywhere in an organization. With multilingual capabilities, you're opening the door for everyone to contribute.

ROBUST TRANSLATION

Granular Management

With options including automatic translation and the power to translate content in-house, you can get as granular as needed.
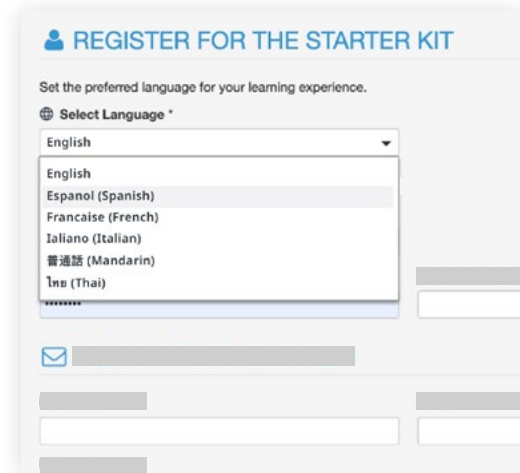

Dynamic Translation

One-click translations for social features, such as comments, posts, and user contributions.

Navigate with Ease

We've done the work of translating navigational buttons across the system, so that you don't have to worry about it.

End-to-End Experience

Users pick their preferred language right from their first interaction. And they can toggle languages whenever they want, for a fully tailored experience.

Any learning system should be inclusive and meet learners where they are. There's a whole world of opportunity out there—don't let language limit your reach.
